

SUMMARY

Entry-level Data Analyst and MS Data Science graduate student at Indiana University Bloomington with hands-on experience in SQL, Python, Java, C, and HTML, and a strong foundation in data analytics. Experienced in data cleaning, exploratory data analysis (EDA), KPI tracking, and dashboard reporting using Tableau and Power BI. Adept at translating business requirements into analytical insights through clear documentation, dashboards, and reports. Known for strong communication skills, stakeholder interaction, and collaborative problem-solving in cross-functional teams, with exposure to analytics use cases aligned with retail and operational data.

TECHNICAL SKILLS

Data Analytics & BI: Data analysis, EDA, data cleaning and validation, data transformation and modeling, KPI tracking, business intelligence, dashboard and stakeholder reporting, clear communication skills, data-driven decision making

SQL & Database: SQL, joins, subqueries, aggregations window functions, query optimization, MySQL, SQL Workbench Oracle, Snowflake, relational databases, data extraction, relational databases, data extraction, normalization, data visualization

Programming & Tools: Java, C, Python, SQL, HTML, Pandas, NumPy, Matplotlib, statistical and regression analysis, hypothesis testing, A/B testing, trend analysis, forecasting, automation scripts, Tableau, Power BI, MS Excel, Databricks, GitHub, Postman, VS Code, PyCharm, Jira, Slack, ETL pipelines, data warehousing, version control, GCP, AWS, Azure

PROFESSIONAL EXPERIENCE

Faculty Assistant – Data Analytics

Indiana University Bloomington

Jan 2026 | Present

Indiana, United States

- Analyzed large, multi-source datasets using Python and SQL, performing data cleaning, preprocessing, and exploratory analysis to identify trends, patterns, and actionable insights.
- Built reusable analytical workflows and scripts to ensure data quality, consistency, and reproducibility across tasks.
- Developed clear visualizations and summary reports, collaborating with cross-functional research teams to communicate findings and support data-driven decision-making for technical and non-technical stakeholders.

AI/ML Engineer (Data Analytics Focus)

Intuz Software Company

June 2025 | Aug 2025

California, United States

- Analyzed 500K plus user interaction records using SQL and Python to identify behavioral trends, improving pricing conversion forecasts by 27 percent supporting data-driven decision-making across product teams organization
- Built data transformation and reporting pipelines supporting KPI monitoring business performance analysis automated insights consistent metrics and executive stakeholder reporting across cross-functional teams
- Designed and evaluated A/B tests for pricing and call-to-action experiments creating interactive dashboards and reports, improving engagement metrics by 22 percent for cross-functional product teams stakeholders

Machine Learning Research Intern

Laurentian University

July 2023 | Aug 2023

Ontario, Canada

- Conducted econometric and statistical analysis on large datasets to evaluate secure data transmission techniques, identify performance tradeoffs, and support evidence based research conclusions.
- Built Tableau and Power BI dashboards visualizing 20K plus data points across economic indicators, improving trend analysis, insight accessibility, and increasing stakeholder engagement by 40 percent.
- Delivered data driven insights through clear visual storytelling and executive ready reports, enabling informed decision-making and effective communication of complex analytical findings.

EDUCATION

[Indiana University Bloomington](#) | Master's in Data Science | **GPA: 3.50/4.00**

Indiana, United States

Courses: Machine Learning, Statistics, Data Mining, Cloud Computing, Human Computer Interaction

May 2026

[Gujarat Technological University](#) | B.Tech in Computer Engineering | **GPA: 4.00/4.00**

Gujarat, India

Courses: DSA, OOP, DBMS, OS, ML/DL, Software Engineering, Big Data Technology, Compilers

June 2024

PROJECT WORK

ML Based Cloud Resource Optimization | Machine Learning, Cloud Computing

- Analyzed 1M+ system log records using SQL and Python to identify utilization trends, performance bottlenecks, and inefficiencies across cloud infrastructure, supporting data-driven operational decision-making.
- Developed KPI dashboards tracking CPU utilization, latency, throughput, and cost metrics, improving reporting accuracy, visibility, and real-time monitoring for stakeholders.

E-commerce Customer Service Chatbot | Machine Learning, Artificial Intelligence

- Analyzed 25K+ customer interaction records using SQL and EDA to identify recurring support trends, customer pain points, and service bottlenecks impacting user experience and operations.
- Built dashboards tracking resolution time, customer satisfaction scores, and automation effectiveness, contributing to 15% improvement in customer satisfaction through actionable insights.

Customer Churn Analysis & Retention Dashboard | Data Analytics, SQL, Power BI

- Analyzed 25K+ customer records using SQL and exploratory data analysis to identify churn patterns, retention drivers, and service bottlenecks, supporting business and operational decision making.
- Built Power BI dashboards tracking churn rate, customer segments, resolution time, and satisfaction KPIs, enabling stakeholders to monitor trends and evaluate retention performance effectively.
